To Whom It May Concern:

We write this letter of recommendation for JBI Electrical Systems, Inc. JBI has been a subcontractor of ours for more than five years on numerous projects throughout Texas. Projects have typically been short duration (construction time of six months or less), high quality retail projects with JBI's contract amounts varying between \$540,000 and \$850,000.

The electrical subcontractor on these projects is always the key to the success of the project, and JBI has consistently been the subcontractor we can depend upon. JBI maintains a team-oriented mindset and works to cooperate with Owner representatives, S. M. Wilson representatives, and other subcontractors. JBI is not a change order driven firm.

We always look forward to a project with JBI onboard and would highly recommend them to any other owner or contractor.

Sincerely,

Steven C. Mast  
Vice President
